Portfolio

About

Product designer with 4+ years of experience designing enterprise products in fintech and media — from a platform for creating interactive content for media audiences to a service for managing lending deals with small and medium-sized businesses. I research users, defend design decisions with stakeholders, and balance UX logic with technical constraints.

Experience

VTB 2025 — present

One of Russia's largest banks. Designing a service for managing lending deals and collateral documentation that replaces a legacy core banking system; target scale — 5,000+ bank employees

Product Designer

Optimized the contract operations flow: operations used to be scattered across tabs, and some didn't even look like operations. Brought them into a single entry point — the Operations sidebar with search and descriptions;

Designed background process tracking: replaced waiting without any feedback with a visible process status;

Result: fewer support requests.

News Media Holding 2023 — 2025

A media holding with 5 news outlets. Designed and evolved an internal platform for interactive content and, to a lesser extent, improved the outlets' websites

Product Designer

Designed an admin panel for interactive content from scratch, unifying scattered tools into a single service;

Enabled simultaneous feature releases for all newsrooms, reducing the development workload;

Ran a full research cycle: session recording analysis → hypotheses → user survey → prioritization (Impact/Effort) → post-MVP improvements;

Designed a built-in image editor, cutting the time needed to create interactive content and the reliance on third-party tools;

Result: +7.8% session time, +41.1% page views, +10.1% pages per session (metrics of the outlets' websites).

Media 1 2022 — 2023

A TV media group. Created graphic and web design for the MUZ-TV, Yu and Solntse TV channels

Web Designer

Redesigned the websites of the Yu and Solntse TV channels;

Created design concepts for the channels' social media;

Designed YouTube thumbnails for MUZ-TV and Yu shows;

Result for Yu: up to +31.3% unique visitors and up to +9.5% video views;

Result for Solntse: +30.3% unique visitors in the first month after launch, +125.9% by the end of 2023.

Education

USPTU 2015 — 2019

Ufa State Petroleum Technological University

Bachelor's degree

Petroleum Engineering (oil and gas transportation and storage)

Yandex Practicum 2025 — 2026

Product Management Fundamentals

Product thinking, metrics, analytics

Tools

FIGMA · MIRO · JIRA · PATHWAY · CHATGPT · CLAUDE · VISUAL STUDIO CODE

Skills

INTERFACE DESIGN (ADMIN PANELS, CRM) · PROTOTYPING · USER FLOW · HYPOTHESIS TESTING · JTBD · SURVEYS · USABILITY TESTING · BEHAVIOR ANALYSIS (SESSION RECORDINGS)
